

GEOMETRY

10-2 Angles and Arcs Online Module

3/31/2015

Today you will begin/complete section 10-2 through an online module, while some of your classmates finish their Discovery Assessment. You may view the 10-2 Powerpoint (if needed), it is found under the Powerpoint section of the Geometry website. To gain full credit for today, you MUST show evidence of taking notes on the section and completing the 10-2 GuidedPractice problems. To complete the module, follow the directions below.

- 1) Click [here](#) to be taken to the Lesson on Central Angles, Arc Measure and Length.**
- 2) Under the Slide Title menu, scroll down and click on Angular Measure. You will complete the remaining slides.**
- 3) After you are complete with the slideshow, go back to the Geometry page and locate the file named [glencoe_geometry_pgs692-698.pdf](#), found under the picture of your textbook. This file is the copy of section 10-2. Complete the GuidedPractice problems (in addition to notes).**
- 4. Once completed, complete the [Check 4 Understanding](#), pg.696 (1-11) all. Hand in at the end of class.**
- 5. If you finish with the [Check 4 Understanding](#), move to [Practice and Problem Solving](#), pg.696-697 (12-32) evens.**
- 6. If you finish with #5, find something to work on from another class.**
